New Supplemental List of Specialties.

DURING the past summer I have personally inspected most of the leading nurseries in Europe, and can now furnish at lowest cost here the best stock obtainable in England or on the Continent, with the best of "home production" as heretofore. Aside from my regular correspondents abroad, I have made many special selections, whereby I can supply *any quantity*, as well as *selected specimens*, better and cheaper than heretofore offered.

For parks and all public institutions or private estates, where future planting is required, particular attention is directed to the great economy and advantage in purchasing the smaller hardy trees in quantity, per thousand, for transplanting. The leading varieties of BEECH, ELMS, MAPLES, LINDENS, HORSE CHESTNUTS, OAKS, etc., can be supplied, three to five feet and larger, at from \$40 to \$75 per 1,000; ARBOR VITÆS, PINES, SPRUCES, SCOTCH FIR, LARCH, etc., one to three feet, all properly transplanted, at \$25 to \$50 per 1,000; shrubs for massing, such as HYDRANGEA PANICULATA, MAHONIA AQUIFOLIA, SAVIN JUNIPER, BERBERRY DARWINI, SAMBUCUS AUREA, etc., at proportionally low rates.

NOTE.—The following list comprises only a few of the varieties disposable per 100 or 1,000 at specially low rates. For a more complete list see catalogue No. 23, forwarded on application.
